POSTAL PATRON

It's that time of year again! The temperature begins to lower and the snow is falling. As the price of heating oil rises, families have turned to an alternative heating source, firewood. Every time you light your fire, soot builds up inside of the chimney and the next time a burning ember goes up the chimney, the soot build up could catch fire. Sometimes just the heat inside of the chimney will be enough to ignite the soot build up. To prevent chimney fires, have your chimney inspected and cleaned regularly. Keep warm, be safe. Thank you!
